

MODULAR II

With the MODULAR II for setters and engravers, you can design your workstation according to your ideas. The design, workmanship and equipment are all of the highest standard. Set-ups in formations enable completely creative solutions for group workstations.

The sophisticated design of the robust four-legged steel frame with an open side view is perfect for versatile use. Four internal hydraulic cylinders, each with a lifting capacity of 150 kg, telescopically extend the inner steel frame upwards. The drawer containers connected to the top panel are lifted at the same time.

Product information

Product category

Barrel tables

Features

Table frame Four-legged steel frame with open side view

Height 900 - 1,200 mm

Armrests 5D Armrest

Options
