

## FLOWBOX wooden frame

Optimize your workspace with a flowbox specially designed for workbenches. The construction of glass panels, set in an elegant wooden frame, meets the requirements of a cleanroom up to ISO 14644 class 5, thanks to the powerful HEPA 14 main filter. The Flowbox operates quietly, with a noise level between just 36dB and 45dB, and offers a modular choice of color and size to fit seamlessly into any work environment.

Ideal for precise work where cleanliness and silence are essential.
