

MODULAR II cleanroom table

With the MODULAR II cleanroom workbench for watchmakers and precision mechanics, you can design your workstation to suit your requirements. The design, workmanship and equipment are all of the highest standard. Arrangements in formations enable completely creative solutions for group workstations.

The sophisticated design of the robust four-legged steel frame with an open side view is perfect for versatile use. Four internal hydraulic cylinders, each with a lifting capacity of 150 kg, telescopically extend the inner steel frame upwards. The drawer containers connected to the top panel are lifted at the same time.

Product information

Product category

Flowbox

Features

Height 850 - 1,250 mm

Table frame Four-legged steel frame with open side view

Options

Table insert work area Shape: semicircular
